Joseph Marion

Subject: FW: 775403-001

20x 775403-001 came in today with a some questionable HP security stickers.

Main concerns from inspection:

1st

Security Labels on the heatsinks do not change color under different lighting as listed in the HPE verification of authentic product (shown below)

June 2011 – Present

1. Security strip has holographic medallions which switch from HP to ✓ to OK and fade to transparent.
2. Three lines of different sized OK text and will fade away (largest alternately to medallions).
3. Color bar has green to Pale Purple color in different lighting.

Below is a picture of one of the heatsinks in question, the arrow is pointing at the bar that should change colors in different lighting

Only 1 out of the 20 that came in passes HPE authenticity verification (pictured below)
